

Exercise 1 – Welcome Page

Task:

- Create a Streamlit app with a **title**, **header**, **subheader**, and **markdown**.
- Write a small **paragraph** introducing yourself.
- Show a **success message** saying "App Loaded Successfully".

Exercise 2 – Personal Info

Task:

- Ask the user for their **name** and **age**.
- Display a message like "Hello, <name>! You are <age> years old."
- If age > 18, show a **success message**, otherwise show a **warning**.

Exercise 3 – Temperature Converter

Task:

- Use the `st.slider` for temperature.
- Convert Celsius to Fahrenheit and display both values dynamically:
$$F = C * 9/5 + 32$$

Exercise 4 – Experience Tracker

Task:

- Use the `st.radio` to select experience level.
- Add a **checkbox**: "Do you want to see tips for your level?"

- If checked, show **custom tips** based on the selection (Beginner → “Practice basics”, Advanced → “Build projects”)

Exercise 5 – File Preview

Task:

- Use your `st.file_uploader`.
- If `.txt` → show the first 10 lines
- If `.csv` → show the first 5 rows
- If `.png` → show the image using `st.image()`

Exercise 6 – Weather Dashboard

Task:

- Use 3 columns (`st.columns`) to show **current weather for 3 cities**
- Cities: New York, London, Tokyo
- Show **temperature** and **change from yesterday** using `st.metric`

Exercise 7 – Favorite Activity Container

Task:

- Create a container with **two columns**:
 - Column 1 → `st.radio`: activity type (Sports, Reading, Cooking)
 - Column 2 → show a **widget** based on choice:
 - Sports → slider to choose hours per week
 - Reading → text input for favorite book

- Cooking → file uploader for a recipe photo
- Show the selected input below the container

Exercise 8 – Score Tracker

Task:

- Use **session state** to track a score
- Buttons: "Add Point", "Subtract Point", "Reset to 5"
- Display the **current score** dynamically

Exercise 9 – Student Form

Task:

- Use `st.form` to collect:
 - Name (text input)
 - Age (slider 0–100)
 - Favorite subject (selectbox: Math, Science, English)
- When submitted, save to **session-state list**
- Display **all submissions in a table**

Exercise 10 – Student Management System

Build a **multi-page Streamlit application** to manage student information.
Students will learn how to:

1. Collect user input via forms.
2. Save and manage data using **session state**.
3. Search data interactively. -> “search by name”
4. Display statistics with **charts and metrics**.

Use advanced layouts: **columns, containers, and expanders**.
